## Crop Storage Location Score: Fruits and Nuts (Nepal - ~ 1Km)

The raster dataset consists of a 1km score grid for fruits and nuts storage location, produced under the scope of FAO's Hand-in-Hand Initiative, Geographical Information Systems - Multicriteria Decision Analysis for value chain infrastructure location.

The location score is achieved by processing sub-model outputs that characterize logistical factors for selected crop warehouse location:

- Supply: Crop.
- Demand: Human population density, Major cities population (national and bordering countries).
- Infrastructure/accessibility: main transportation infrastructure.

It consists of an arithmetic weighted sum of normalized grids (0 to 100):

("Crop Production" \* 0.4) + ("Human Population Density" \* 0.2) + ("Major Cities Accessibility" \* 0.3) + ("Regional Cities Weighted Accessibility" \* 0.1 )  
Completed

WMS

#### npl\_score\_fruitsandnuts

Crop storage location score: Fruits and nuts (Nepal)

This dataset is published in the view service (WMS) available at [https://data.apps.fao.org/map/gsrv/edit/npl\\_hih\\_meda/wms](https://data.apps.fao.org/map/gsrv/edit/npl_hih_meda/wms).

### Associated resources

## Crop Storage Final Location: Fruits and Nuts (Nepal - ~ 1Km)

The 1km raster dataset represents top location score areas filtered by exclusive criteria: access to finance, distance to major roads and access to IT. The layer is produced under the scope of FAO's Hand-in-Hand Initiative,... [more...](#)

## Technical information

### Update frequency

Not planned

### Representation type

- Grid

### Resolution

- 1 km

### Coordinate reference system

- WGS 1984

### Format

TIF

### Lineage

Major data sources, FAO GIS platform Hand-in-Hand and OpenStreetMap (open data) including the following datasets:  
1. Human Population Density 2020 – WorldPop2020 - Estimated total number of people per grid-cell 1km.  
2. Global Agro-Ecological Zones V4 (GAEZ) - Actual Yields and Production 2010  
3. OpenStreetMap.

## Source datasets

### Accessibility: Travel Time-Cost to Cities (Nepal ~ 1Km)

Accessibility to cities dataset is modeled as raster-based travel time/cost analysis. The model travel time/cost from/to cities is defined as the OpenStreetMap national capital, cities, and towns within Nepal. This 1km resolution raster dataset is... [more...](#)

Source dataset

### Accessibility: Travel Time-Cost to Regional Cities (Nepal ~ 1Km)

Accessibility to regional cities dataset is a raster-based analysis to calculate the travel time/cost to regional cities. Regional cities are defined as OpenStreetMap cities within a 500km radius, within the Nepal border. This 1km resolution... [more...](#)

Source dataset

Crop Production (derived from GAEZ v4 for 2015)

This dataset is one derivative product from GAEZ v4 for year 2015 that includes gridded (5-arcminute resolution) irrigated and rainfed crop harvested area and crop yield for 26 different crops/crop categories (please see GAEZ\_2015\_Dimension\_crops.csv for... [more...](#)

Source dataset

Human Population Density (Global - Annual - 1 km)

Estimated density of people per grid-cell. The units are number of people per Km<sup>2</sup> per pixel. The mapping approach is Random Forest-based dasymetric redistribution. The WorldPop project was initiated in October 2013 to combine the... [more...](#)
