

## Legend.

Number of days under direct path of a storm.

1 15 or more

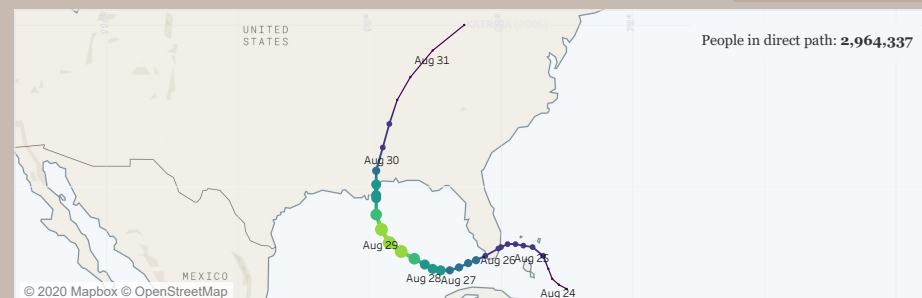

**HIGHLIGHT any mark** to show the latitude/longitude (in half-degree increments), the population of that region, the nearest city of at least 100,000 inhabitants, and the number of days bearing the brunt of a storm.

**CLICK any mark** to see the tracks of the specific storms that have moved directly over that area; their names (if any), their dates, and their strengths at various times of observation.

## Monsters.

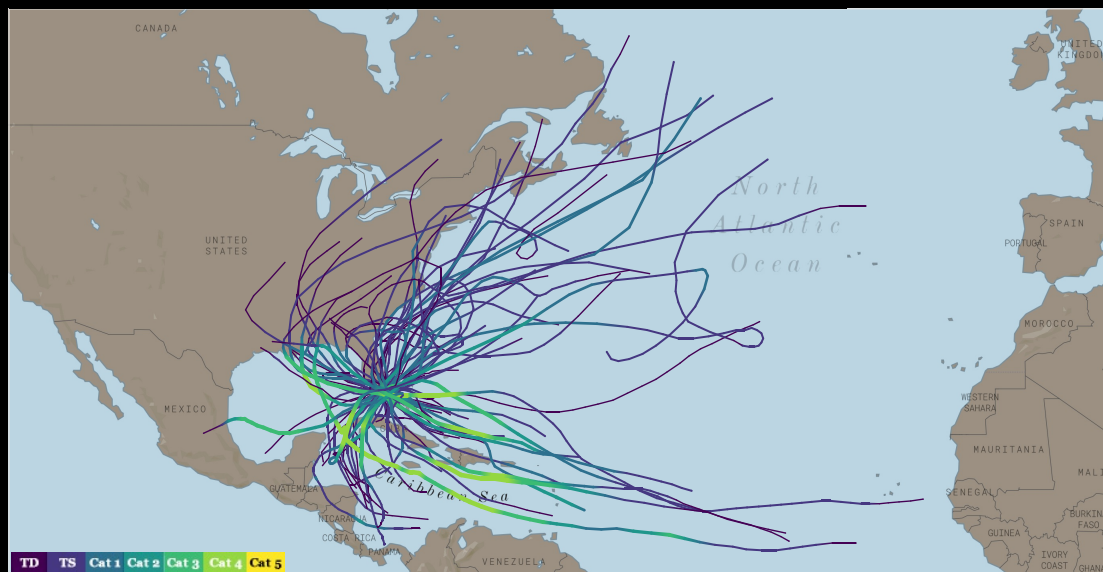

See the path of any storm in history to have reached Category 4 or higher.
