COUNTRIES BY POPULATION SIZE

# Visualizing the Most Populous Countries in the World

India’s population is projected to surpass China’s as soon as 2022.

While this is consequential on a global economic level, it also leaves other population tre overlooked. For instance, Nigeria is projected to have more people than the U.S., the worl largest country by population, by the year 2050.

This treemap visualization, adapted from [PopulationPyramid.net](#), is an overview of the g population in 2020, showing us the world’s most populous countries.

## The 50 Most Populous Countries

China, with a population of 1.44 billion, is the most populous country worldwide.

In 2019, over 60% of its population resided in [urban centers](#), a trend that has seen the po city dwellers double over the last 25 years. For context, 83% of the U.S. population lives in while just 35% of India’s population dwells in urban areas.

Together, China and India’s populations make up over 36% of the global total.

Extending over 17,000 islands, Indonesia comes fourth among the world’s most populous countries, standing at 273.5 million people.

Pakistan comes in fifth, with 220.8 million. Karachi, located on the southeastern coast of is home to over 16 million people alone. It is Pakistan's most populous city, and the seven largest city in the world.

Nigeria also makes it onto the list. In just three decades, the country's population is projected to climb from 206 million to 400 million—growing at a percentage clip that is more than double that of India.

## The 50 Least Populous Countries

Combined, the 50 least-populous countries make up under **0.4%** of the total world population. In contrast, the top 50 account for 87% of the total.

Unsurprisingly, the world's low population nations are situated on small islands, often tropical and reliant on tourism.

*\*Source: United Nations, as of July 1, 2019. Includes territories.*

With a total of 799 residents in 2019, Vatican City is the least populated country. Following behind is the territory of Tokelau, a cluster of islands situated between New Zealand and

The Caribbean island nation of Antigua and Barbuda is also among the smallest populations in the world, with just 97,118 inhabitants. While it may be small in terms of total inhabitants, its population density is another story—with over 222 people per square kilometer. That is 150% higher than China, but about half the population density of India.

Meanwhile, the 33 atoll islands of Kiribati also make the top 50 list of the least populous countries worldwide. With a population of 117,606, Kiribati was a testing site for atomic bombing by the British and Americans during the 1960s. The island reached independence in 1978, having been under crown colonial rule since 1916.

## Regional Median Ages

How about the median ages across these populations?

By far, the African region has the lowest median age at **19.8 years** old, partially driven by a high birth rate of 4.7 children per woman. In contrast, the global average falls around 2.5 children per woman.

By 2050, Africa’s population will effectively double from 1.3 billion to 2.5 billion.

| Region                    | Annual Rate of Natural Population Increase | Median Age (years) |
|---------------------------|--|--------------------|
| Africa                    | 2.5%                                       | 19.8 years         |
| Asia                      | 0.9%                                       | 32.1 years         |
| Central America           | 1.2%                                       | 28.3 years         |
| Europe                    | -0.1%                                      | 42.7 years         |
| Latin America & Caribbean | 0.9%                                       | 30.9 years         |
| Northern America          | 0.3%                                       | 38.6 years         |
| Oceania                   | 0.9%                                       | 33.5 years         |
| South America             | 0.9%                                       | 32.0 years         |
| World                     | 1.0%                                       | 30.9 years         |

Source: *Our World in Data*

On the other hand, Europe is the oldest, at **42.7 years** for this demographic metric.

With a median age of 47.9, Italy has the second-oldest population in the world, topped only by Japan. Meanwhile, Germany (46.6), Portugal (46.2), and Spain (45.5) fall next in line. If current trends continue, the median age of the world population will rise to 35.5 years by 2050.

trends continue, by 2050, half of Europe's population will be non-working and over the a

That said, it should be noted that this trend is not exclusive to Europe. In 30 years, **1.5 bil** people globally will be over the age of 65, amounting to 16% of the global population.

# The Best Selling Vehicles in America State

From Fords in the Midwest to Toyotas on the coasts, here are the best selling vehicles in America, visualized by state.

Published 6 days ago on September 24, 2021

By **Omri Wallach**

## The Best Selling Vehicles in America, By State

From Ford trucks in the Midwest to Toyotas on the coasts, the best selling vehicles in America reveal a lot about the country.

Compared to other countries with fewer highways or narrower roads, the U.S. is very much a truck-friendly country. Across the U.S., the most sold vehicle in 2019 was the Ford F-Series of trucks, primarily the F-150.

As the home of the world's pioneer automotive manufacturers, including Ford and GM, consumers primarily purchase local brands. But that hasn't stopped Toyota, the large foreign manufacturer in the world, from also gaining a foothold.

This graphic uses 2020 sales data from automotive information resource [Edmunds.com](#).
